

One grade. One truth. One place for your security posture.

Security reviews slow down too many deals. Buyers ask for proof, and what they usually get are outdated PDFs, scattered documents, or long email chains that eat up time and trust. That's where Astra's Trust Center comes in, a continuous and publicly accessible security hub that turns compliance questions into competitive advantages.

The Astra trust center advantage

✓ Continuous verification

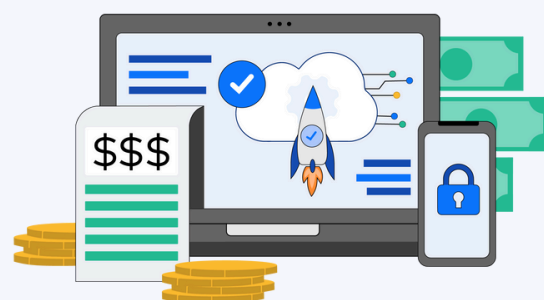

Continuous security metrics that update automatically, meaning no more "trust us" conversations. Buyers see continuous vulnerability scans, penetration test results, and compliance status in real-time

✓ Trust that travels

A trust seal is a clear trust signal that travels with you. Improve credibility wherever you show up by embedding it on websites, proposals and marketing materials

✓ Real-time proof over paper promises

Replace security questionnaire with instant security transparency. While competitors send static reports, you provide live dashboards that prove your security commitment 24/7

Why revenue teams love it?

- Shorter sales cycles, faster trust
- Build buyer confidence, close deals faster
- Single source of truth
- Customer-ready from day one

What makes our security center unstoppable?

Continuous scans & automated updates

Set it once, trust it forever. Astra's platform runs continuous security assessments and pushes updates directly to your Trust Center

Brand integration

Your Trust Center becomes an extension of your business with custom colors, your logo and your branded URL

Compliance evidence in one place

SOC 2, ISO 27001, PCI-DSS, GDPR, HIPAA, OWASP 2021, all your frameworks live in one verified location

Get full control of what you share

From headers and security posture to assessments, compliances, monitored APIs, vulnerability reporting, and FAQs

Built-in responsible disclosure

Integrated vulnerability reporting channel shows you take security seriously at every level

AI-assisted creation

Select your security targets, review AI-generated content, customize, and publish in minutes
