

# He Slipped Through from Portal to Code

A new breach appears just as the gate closes.

They thought it was sealed until CVE-2025-66478 slipped in.

# When Code Goes Rogue

Devices in Hawkins Lab glitch in unison.

CVE-2025-66478 allows full code execution and device takeover.

# He's In Their Heads

The exploit manipulates processes—and people.

My tablet keeps  
reloading to weird  
URLs

Something's wrong  
with the network.

The walkie-talkie is...  
whispering back.

Reload loops and poisoned requests hit. Eleven senses it first.

# Astra Sees the Pattern

Our scanner locks onto the high-severity signature.

Astra detects CVE-2025-66478 and triggers countermeasures.

# Containment... But Not the End

astra

**We patch the breach, but Vecna evolves.**

**Astra scans CVE-2025-66478. The breach closes but a new crack forms. Vecna adapts.**

He's Not Alone.

astra

When one vulnerability evolves... others emerge from the shadows.

Scanner's picking up  
new threats...  
unfamiliar patterns.

ALERT: UNKNOWN ANOMALY DETECTED  
THREAT CLASS: UNDOCUMENTED  
VECTOR: UNKNOWN

Just as Vecna begins to fade...something new begins to rise.
